

Name: Runqiu HUANG

Title: Deputy Minister, Professor

Affiliation: Ministry of Ecology and Environment of the People's Republic of China

Fields of Research: Engineering Geology;
Geological Hazards and Rock Mechanics

Professor Runqiu HUANG is a leading Chinese scientist in engineering geology, geological hazards and rock mechanics, who has greatly contributed to the advancement of engineering geology in China. He is now the Deputy Minister at the Ministry of Ecology and Environment of the People's Republic of China and Chief Science Communication Specialist of the China Association for Science and Technology. Prof. Runqiu Huang has established the "State Key Laboratory of Geo-hazard Prevention and Geo-environment Protection (SKLGP)", which is the only national level laboratory, center of excellence for geohazards and engineering geology in China. He has contributed to the profession through more than 400 scientific publications, among which 178 in ISI journals (including 2 papers in "Nature Geoscience") with more than 5900 citations (3863 cited by Web of Science) so far, 24 monographs and about 90 international conference proceedings. He is one of the most-cited Chinese scientists in Engineering Geology. In 2018, Prof. Runqiu Huang has been awarded the *Hans Cloos Medal* of IAEG, which represents the highest honor in the field of engineering geology in the world.
